

## International Day of Persons with Disability, 2018

Since 1992, the United Nations International Day of Persons with Disabilities (IDPD) has been annually observed on 3 December around the world. The theme for this year's IDPD is "Empowering persons with disabilities and ensuring inclusiveness and equality".

Stroke is a leading cause of Death and Disability around the world. But that's just part of the story. 80 million people in the world have had a stroke; 50 million stroke survivors live with some form of permanent disability.

If you had a stroke, or care for someone who has, one thing is for sure – you are not alone! We are here to help you.
