

2nd International Vitiligo Day

25th June 2016

All India Institute of Medical Sciences Bhopal
MP – 462020

Vitiligo causes harmless white patches on the skin. It can occur at all ages in men and women on any part of the body. Vitiligo does not spread by touch or body contact. It is not leprosy. Some types of Vitiligo can be treated.

In this event, we will spread awareness about Vitiligo and the treatment options & research at AIIMS Bhopal.
