Centre of Excellence Male Family Planning at AIIMS Bhopal

India is a populous country coupled with limited resources. It is essential that an individual is empowered to decide the right size of the family in order to sustain decent living.

NSV (Nonscalpel vasectomy) is a proven method of permanent male sterilisation. It is safe, effective, modern, minimal invasive, day care procedure for permanent method of male sterilization with no unwanted side effects. The NSV program is strongly encouraged by Central as well as state governments.

Dept. of Surgery AIIMS Bhopal is initiating “Centre of Excellence Male Family Planning”. It will offer a bouquet of services like No Scalpel Vasectomy (NSV), Evaluation of infertility problems, and treatment of male partner, Testicular Biopsies and other investigations as a part of evaluation of male infertility. In addition to this patients will also be counseled about other problems related to family planning.

This specialty clinic will be on every Tuesday and Thursday in SOPD Block from 2-5 PM.
