World Gynecologic Oncology Day
26 September 2020

Theme:- GO for...Awareness, Action, Hope and
Life – a world with no gynecologic
cancers

WORLD Gynecologic Oncology Day (World GO Day)

September being World Gynecologic Oncology Month, Department of Obstetrics and Gynecology is organizing **Online CME** on update on ovarian cancer on the occasion of World Gynecologic Oncology Day on 26th September 2020, **11am - 01pm.**

Over 1.3 million women worldwide were diagnosed with gynecologic cancers in 2018: approx. 44% with cervical cancer, 23% new cases of ovarian cancer, 29% with endometrial cancer and less than 5% were diagnosed with other gynecologic cancers, i.e. vulvar and vagina cancers.

Regular screening and examinations, as well as lifestyle choices, can increase the chance of prevention or even early diagnosis of gynaecological cancers. The objective of the WEBINAR is to create awareness about Ovarian Cancer, keeping abreast of the recent advances in management of ovarian cancer patients and Celebration of survivors who have conquered cancer. Early diagnosis is key for all gynaecological cancers.
