

DEPT OF DENTISTRY, AIIMS, BHOPAL

COMPLETE DENTURE CAMP

Date : 26th to 30th March. 2019

COMPLETE DENTURE CAMP

Department of Dentistry, AIIMS - Bhopal

Department of Dentistry, is organizing a **5 day Denture Camp** for **completely edentulous** geriatric patients from **26th to 30th March 2019**
Registration will be limited to **50** patients on first come first basis.

Edentulism is the condition of being **toothless** to at least some degree as a result of **tooth loss**. Loss of some teeth results in partial edentulism, whereas loss of all teeth results in **complete edentulism**.

Functionality of teeth is very important. They, serve to:

- Cut, grind, and chew food which aids in overall nutrition & health maintenance
- Support lips and cheeks, providing for a fuller, more aesthetically pleasing appearance
- Allow for the proper pronunciation of various sounds
- For overall psychological well being

Complete denture fabrication requires multiple patient sittings and a precise coordination between clinical and laboratory staff. The registered elderly patients will be provided with the fabricated dentures within a duration of **2-3 months**.
