Sl. No.	Tender Document Page no.	Existing clause.	Should be read as
1	28 of 79	<p><u>Financial Quotations Guidelines:</u></p> <p>*The percentage of the diets served per day are approximate based on the previous pattern of patients admitted in the hospital. The percentage is a rough guide and has nothing to do with actual diets to be served on daily basis which shall exclusively depend upon the actual number of patients admitted for that category of diet.</p> <p>**The bed occupancy rate varies from time to time. However current trend is around 600 patients.</p> <p>***The bed capacity of private ward is 50 beds. However, the number diets to be served will depend upon the actual occupancy at a particular day.</p>	<p>Proportion of type of diets is given in column 2. For the purpose of calculation, a total of 650 patients/day with a load-factor of 600 patients for general wards and 50 for private ward is to be considered. A product of the offered unit rate for each diet type, load-factor, and proportion in column 2 will be computed for each cell in column 3 and 4. Sum-total of all entries in column 3 and 4 is B and C respectively."</p>
