Technical specifications

I. Video Cholelithoscope System

System should include following:

1. The live image (transmitted) should be in high resolution.
2. Standard video image Processor should be available.
3. High resolution Video camera should be available.
4. Good quality Full HD Recording Device.
5. Lighting.

II. Disposable Video Cholelithoscope

A. Should have following specifications:

1. Should be easy on the eye (resolution)
2. Should have multiple LED provided for continuous motion image.
3. Should be fully adjustable in (position) rotation and (lock) to compare with Full HD quality resolution.
4. Video image should be HD (1080p) or more.
5. Operation of camera should be simple (control camera).
6. Depth of field should be 5-6 meters or more.
7. The axial (field of view) diameter should be 2.5 (over 25.5) mm.
8. The (depth) of view should be 5-6 meters or more.
9. Magnification (Cholelithoscope) should be 10-15 times or more. To 20-30 degree or more (more).
10. Working length should be around 20-25 cm or more (20-25 cm or more).
11. A hand piece (for operation) should be 20 cm or more.
12. Minimum (depth) of view should be 2.5 meters or more (2.5 meters or more).
13. Should be compatible with standard video.

B. Cholelithoscopes should be supplied with following accessories:

Item	Quantity
1. Cartridge and its storage	10
2. F.O.V. Cap	10
3. Carriage Stand	10
4. 2 (detachable) cleaning brushes	10
5. 2 (detachable) biopsy forceps	10
6. 2 (detachable) biopsy forceps	10
7. Carriage (Storage) Rack	10
8. Heavy duty (Storage) Rack	10

C. Compact full HD Video Image Processor with LED light source should have following specifications:

1. Source should be 1 or High Resolution (HD) with resolution of 1920x1080 pixels and frame rate of 30fps.
2. Should have ergonomically placed programmable controls (touch) and the easy access to camera, light and storage.
3. Should have (basic) for mounting camera, processor and (holding) of (video) tape or (storage).

Technical Specifications of Equipment

3. Should have access to high speed internet (minimum 10 Mbps) and recording system (minimum 1 TB storage) for LCAAP Case.
4. Video processor should be ready for connecting with 1080P HD C-VIDEOS camera lens.
5. Should have recording resolution as high as 1080P and 30FPS/60FPS.
6. Should have resolution of 1080P minimum (minimum of 1080P) Same or similar depends upon the brand.
7. Should have minimum 1 TB storage (minimum of 1 TB) for recording.
8. C-VIDEOS camera lens should be of at least 1080P lens.
9. C-VIDEOS camera lens should have optical zoom lens (not digital zoom) minimum of 2x magnification of optical zoom and the patient in the recording room should be visible in the lens (Narrow-Field Imaging).
10. Should be from same manufacturer.

3) Medical Grade Video Monitor should have following specifications:

1. It should have minimum 1080P resolution (1080P, 1440P) Screen with LED panel having resolution of 1080P, 1440P pixels and aspect ratio 16:9.
2. It should have minimum 1080P resolution (minimum of 1080P) for recording.
3. It should have minimum 1080P resolution (minimum of 1080P) for recording.
4. Should have camera lens having optical zoom lens (not digital zoom) minimum of 2x magnification of optical zoom and the patient in the recording room should be visible in the lens (Narrow-Field Imaging).
5. Should have minimum 1 TB storage (minimum of 1 TB) for recording.
6. Should be from same manufacturer.

4) Best Clinical 4K HD Recording Device should have following specifications:

1. Frame should be 4K (3840x2160) resolution and frame recording (minimum of 30FPS) for recording.
2. Should have minimum 1080P resolution (minimum of 1080P) for recording.
3. Should have minimum 1080P resolution (minimum of 1080P) for recording.
4. Should have minimum 1080P resolution (minimum of 1080P) for recording.
5. Should have minimum 1080P resolution (minimum of 1080P) for recording.
6. Should have minimum 1080P resolution (minimum of 1080P) for recording.

5) Trays should have following specifications:

1. Should be stainless steel & have enough space for recording system.
2. Should be stainless steel & have enough space for recording system.
3. Should be stainless steel & have enough space for recording system.
4. Should be stainless steel & have enough space for recording system.
5. Should be stainless steel & have enough space for recording system.

Notes:

1. All equipment should have minimum 1080P resolution.
2. All equipment should be L-10115, 1080P C-VIDEOS approved.
3. All above equipment items should be supplied from same manufacturer (if any).
4. Company should have state of the art service center in India to do in house repair.
5. Bizarre violation in terms of terms should be reported to take hold of those equipment.
